Professional Summary

Junior Software Engineer with hands-on experience designing and building full-stack web applications using **C#, ASP.NET Core, React, and SQL Server**. Proven ability to develop RESTful APIs, implement authentication and authorization, integrate third-party services such as **Stripe**, and deploy real-world applications. Strong problem-solver with a background in structured environments, clear communication, and agile development practices.

Technical Skills

Languages: C#, JavaScript, SQL, Python

Frameworks & Libraries: ASP.NET Core, MVC, React

Frontend: HTML, CSS, Bootstrap, Tailwind

Backend: RESTful APIs, JWT Authentication, ASP.NET Identity

Databases: Microsoft SQL Server

Tools & Platforms: Git, GitHub, Stripe API, Cloudinary

Development Practices: Agile/Scrum, API Design, Full-Stack Development

Projects

CardShop – Full-Stack Trading Card E-Commerce Platform

ASP.NET Core Web API, React, SQL Server, Stripe, JWT, Cloudinary - Designed and implemented a RESTful backend API using ASP.NET Core and SQL Server - Implemented JWT-based authentication and role-based authorization using ASP.NET Identity - Integrated Stripe for secure payment processing and order management - Built a React frontend that consumes the API with protected routes and state management Implemented image upload and storage using Cloudinary for product listings - Designed DTOs and services to support scalable and testable business logic

Magic: The Gathering Card Management & Inventory System

ASP.NET Core, React, Scryfall API, SQL Server - Integrated the Scryfall API to search and retrieve Magic: The Gathering card data - Built functionality to save selected cards into a custom database for inventory tracking - Implemented full CRUD operations for cards and collections - Designed a clean UI for searching, viewing, and managing card data

Softball Statistics Tracking Application

.NET Web API, React, SQL Server - Developed a backend API to manage teams, players, and game statistics Implemented aggregation logic to calculate batting averages and total statistics - Built a React frontend with user authentication and protected views - Designed database relationships for players, teams, and stat records

Professional Experience

Security Officer – Blount Memorial Hospital

October 2021 – Present - Document incidents and maintain accurate reports for compliance and review Communicate effectively with multiple departments in time-sensitive situations - Follow strict procedures and protocols in a high-responsibility environment - Demonstrated reliability, attention to detail, and strong situational judgment

Security Officer – Shield & Buckler Security

March 2020 – October 2024 - Provided on-site security and incident response for client facilities - Maintained detailed documentation and followed established operational procedures - Worked independently and as part of a team in dynamic environments

Education

Associate's Degree – Information Systems (Computer Programming)

Walter State Community College - Studied C#, web development, databases, and agile programming practices - Founding member of the Walter State Community College chapter of the ACM

High School Diploma Seymour High School

Additional Information

- Strong written and verbal communication skills
- Experience working in structured, compliance-driven environments
- Self-motivated learner with a strong interest in backend and full-stack development
